Request for IPC Targets on Czechoslovakia

REF : St/I Office Notice No. 194

Objective II d.

Background

The aircraft factory at Vodochody near Prague was the first satellite produced of jet aircraft, initiating production of the MIG-15 (Fagot) fighter in 1953, and U-MIG-15 (Midget) in 1954. Fagot production probably ceased in late 1955, but Midget production has continued, though recently at a low rate. Occasional MIG-19's (Farmers) have been observed at the factory since early 1958, and it was expected that series production of Farmer would start in early 1959. To date, however, production has been at a lower rate than expected.

In the Letnany-Cakovice complex in Prague, production of the Avia-14 (Crate) is continuing.

Sport and trainer-type aircraft are produced at Kunovice and Chocen. Both helicopters and piston-engine trainers are produced at Otrokovec.
